

Mechanical Engineer

As a result of our continued success with repeat opportunities from existing clients and a range of new clients, our team in Haywards Heath are looking for a Mechanical Engineer to assist the team in developing mechanical engineering designs for construction projects

We are a friendly, busy and motivated MEP design team with an established track record of successfully delivering projects in the South and East of the UK.

With a secured and pipeline workload comprising of projects within the Education, Healthcare and Residential sectors you would be pivotal in offering MEP design expertise to cover the whole project lifecycle, from feasibility through design development detail design and in construction. You will be ideally familiar with RIBA stages and the required outputs at each stage. You will be working with a multi-disciplinary design team, undertaking mechanical design activity and advising on risk relating to your area of activity, whilst being mindful of the programme, quality and cost requirements of your work.

You would have opportunity to be involved in a portfolio of projects ranging from faster simpler projects to full multi-disciplinary design projects with multi-million pound budgets.

Some of our recently completed and secured projects comprise:

1. Internal refurbishment of commercial kitchen in at Grade 2 Listed College Campus.
2. Building services design for net zero carbon in use housing scheme.
3. The refurbishment of Secondary School Science Laboratories.
4. Alteration and refurbishment of secondary schools to provide SEN facilities.
5. Full building services design for a new build comprehensive school.
6. Condition surveys and providing MEP plant registers.
7. Decarbonisation option appraisal assessments for corporate buildings.

You would be expected to work closely with the team Director to ensure that projects are delivered efficiently, professionally and meeting the Clients expectations. We would encourage you to play an active part in collaborating with the immediate and wider teams together with providing guidance and encouragement to our more junior colleagues who are in their earlier stages of their career.

About Hamson Barron Smith

Hamson Barron Smith are an integrated design and building consultancy founded on the principles of quality, innovation, respect and trust.

We operate from a national network of key strategic geographic hubs: London, Haywards Heath, Norwich and Edinburgh. As part of the Norse Group, we have access both to additional resources and specialisms, but also a diverse portfolio of work opportunities.

Hamson Barron Smith

We provide the core services of Architecture, Quantity Surveying, Building Surveying, Project Management and Building Services Engineering. We also have smaller but equally important teams of Structural Engineers, Geo-Environmental Engineers and Landscape Architects.

As a specialist interdisciplinary consultancy, Hamson Barron Smith have professional teams who provide a wide range of skills and experience each bringing their passion, interest, unique skills and experience to each project. We work well as a group, have fun and respect each other's individual drivers.

We support our staff in their career growth and provide opportunities for development throughout the Company and encourage all colleagues to think innovatively to ensure that we continue to drive forwards as a Consultancy practice.

Hamson Barron Smith is private limited company which is wholly owned by Norse Consulting Group Limited and as such is part of the Norse Group. We share some central resources with the Norse Group and trade internally with other companies in the Group in addition to our external clients.

The Norse Group is the largest Local Authority trading company (LATCo) in the UK and is ultimately owned by Norfolk County Council.
